structure is positioned to make contact with the non-cutting edge of the blade (Fig. 5), that the blade support structure includes a stop block that is a prism (32), that the stop block has a groove aligned with the blade (Fig. 5), a means for adjusting the longitudinal position of the blade support structure (36), that the longitudinal position of the blade support structure is locked with a set screw (36), that the top of the stop block is less than .25 inches from the surface of the worktable (Fig. 1), that the blade has a cutting and non-cutting edge (Fig. 1), and that the stop block is adjustable in the longitudinal direction.
